## PRODUCT DATASHEET

# ID BOX Age

Check people's age in a flash

For the sales of restricted or sensitive products such as alcohol and tobacco it is required to verify the age of the buyer. In order to check this, Elyctis has developed a fast and convenient device. All what is needed is to connect the ID BOX Age to the mains, insert the document (Passport or ID Card) and the technology advanced scanner will calculate the age, results are given visually by means of LED's, and sound.

The ID Box Age is extremely fast in operation. It prevents mistakes in age calculation and possible recriminations. Due to it's size, it needs little space on counter or desk.

The ID BOX Age scanner supports any document featuring people's birthdays due to its Machine Readable Zone (passport, ID, Driving licence etc…).

Applications:

~ Sales of Alcohol (supermarkets, bars, discotheques…)
~ Sales of Tabacco (Shops, automatic vending machines)
~ Entry / Access into Club's, Casinos etc.
~ …
