## Elyctis ID reader product range now covers the whole citizen journey allowing to read eID and ePassport seamlessly in all situations

---

**Elyctis, an expert in eID and ePassport readers, now offers a full range of products dedicated to providing citizens a fully seamless journey encompassing all eID reading needs from home to government or commercial locations.**

**PERTUIS, FRANCE, November 20, 2018** – Thanks to its long-standing expertise in ID reader development and industrialization, Elyctis is proud to reaffirm its leading position on the ID reader market, as the company now proposes a full range of readers able to satisfy all needs including usage for enrolment, home reading, eID control, etc. Elyctis ID reader range can be used by professionals either in a fixed location or on the move as well as by end-users at home.

Elyctis ID BOX One, the company classical desktop eID-dedicated reader, allows to complete a wide variety of tasks. For instance, the Elyctis ID BOX One - Desktop series can be used for commercial applications such as ID reading for travel agents, hotel check-in, car rentals, etc. In terms of government applications, the Elyctis ID BOX One - Desktop series perfectly fits application requirements to check ID for votes in a polling station, at enrolment stage or at eID document delivery stage.

Elyctis ID READER is dedicated to home usage. It is the best option for governments willing to deliver high-quality citizen services while guaranteeing a strong authentication. The Elyctis ID READER allows to develop home eID projects while keeping the deployment costs under control. It can also be used for non-government applications such as authenticating users for banking applications, healthcare insurance or any other service.

Alexandre Joly, CEO of Elyctis comments: "Our range of products is now complete allowing to propose a full citizen journey regardless of the ID reading location. With our products, systems integrators and application developers can now fulfill all application requirements for reading eID documents, regardless whether the usage is government or commercial, fixed or mobile, in a dedicated location or at home."

Elyctis will be exhibiting at Trustech, the leading event for digital trust technologies, on booth RIV H 049. The event will take place in Cannes, France, on November 11-13, 2018. Come and visit us!

## About Elyctis

Created in 2008, Elyctis mission is to supply system integrators with mobile and fixed hardware to access data of eIDs (NIC, passport, resident permits, driving license). The company specializes in the development, industrialization, production and marketing of readers and terminals dedicated to Secure Identity Documents (e-passport, e-ID card, e-driver license,..). The company, which now employs 25 people, has a longstanding expertise in eID projects, as well as hardware and software developments, especially in the combination of optics, antenna design, high security software and integration. Elyctis sells its products through its network of distributors and systems integrators, to whom it provides development environment to facilitate the use of its readers. Elyctis is headquartered in Pertuis, France, and has a sales office in Hong Kong.

Alexandre Joly, Elyctis founder and CEO is a laureate of Reseau Entreprendre since 2011, and a laureate of the Reseau Entreprendre Ambition program in 2016.
